

How to Use the StudyWare™ CD-ROM

The StudyWare™ software helps you learn terms and concepts presented in the *3-2-1 Code It!* textbook. As you study each chapter in the text, be sure to complete the activities for the corresponding content areas on the CD-ROM. Use StudyWare™ as your own private tutor to help you learn the material in your *3-2-1 Code It!* textbook.

Getting started is easy. Install the software by inserting the CD-ROM into your computer's CD-ROM drive and following the on-screen instructions. When you open the software, enter your first and last names so the software can store your quiz results. Then choose a content area from the menu to take a quiz, complete one of the activities, or complete coding cases.

Menus

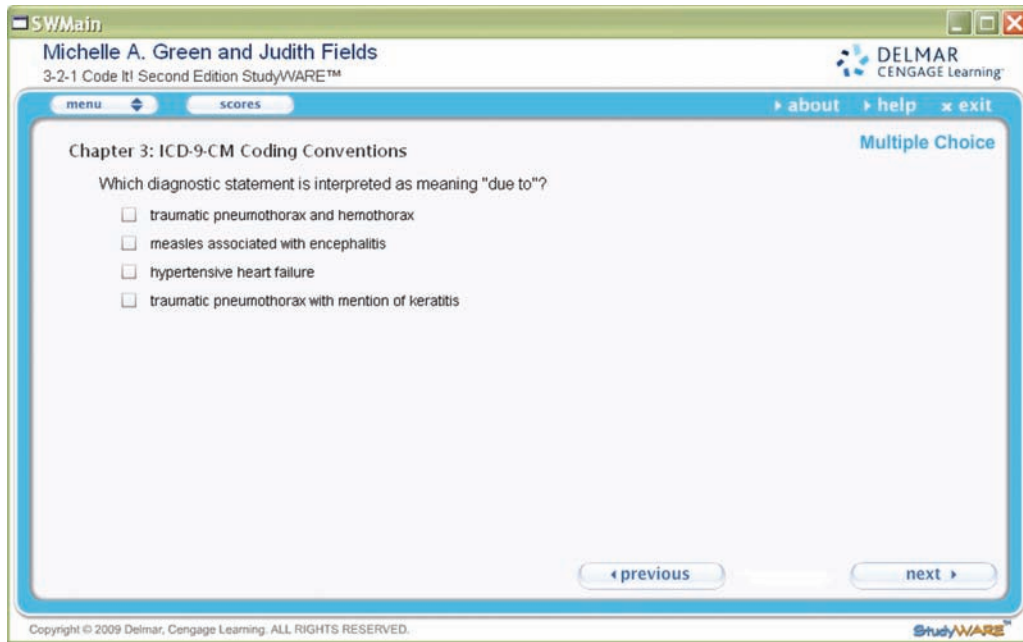

You can access any of the menus from wherever you are in the program. The menus include Chapter Quizzes and Activities, Coding Cases, and Scores.

Quizzes

Quizzes include multiple-choice, true-false, and fill-in-the-blank questions. You can take the quizzes in both Practice Mode and Quiz Mode.

- Use Practice Mode to improve your mastery of the material. You have multiple tries to get the answers correct. Instant feedback tells you whether you're right or wrong and helps you learn quickly by explaining why an answer was correct or incorrect.
- Use Quiz Mode when you are ready to test yourself and keep a record of your scores. In Quiz Mode, you have one try to get the answers right, but you can take each Quiz as many times as you want.
- You can view your last scores for each quiz and print out your results to submit to your instructor.

Activities

Activities include hangman, crossword puzzles, and concentration. Have fun while increasing your knowledge!

Coding Cases

Coding cases were created at intermediate and advanced levels, and they include images and videos. View the StudyWare Coding Cases Table in the preface of this book to locate corresponding textbook chapter(s) so you know when to complete the coding cases.
