Demo on the Online Companion

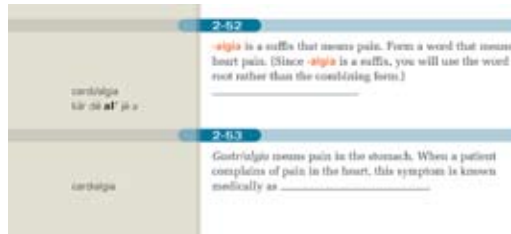

Word-Building Approach

- Word roots, prefixes, and suffixes are combined to create terms
- Book presents medical word parts and terminology organized by human anatomy and physiology body systems (ex. cardiovascular system, etc.)
- Organization from simple to more complex terms encourages greater memory retention

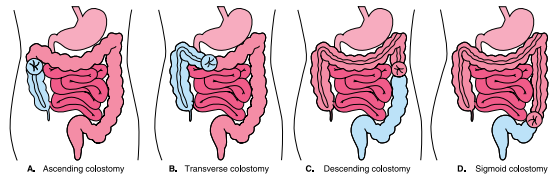

Programmed (“Frame by Frame”) Systems Approach

- Book divided into short units which contain questions and information in small numbered sections called frames
- Promotes active participation and reinforces terminology through repetition
- Learners may work through frames in the class with instructor guidance or for self-guided study

Illustrated Approach

- Uses a “read, look and listen” approach to teach students to speak and write terminology. A less textual approach using heavy illustrations, tables, and written and audio exercises, this is ideal for visual and auditory learners.

Contextual Approach

- Presents clinical and technical information by combining actual medical reports and real-world examples with basic medical terminology

DIAGNOSTIC PROCEDURES		
Word	Pronunciation	Definition
Radiology (continued) computed tomography (CT) or computed axial tomography (CAT) scan	tō-mōg'rā-fē, 3ī'sā-3ī	evaluating abnormalities of lymphoid (and other) organs by producing an image of the target organ using a computer to analyze the variance in absorption of a radiographic beam
magnetic resonance imaging (MRI)		making images of tissues and organs using the characteristic behavior of protons when placed in powerful magnetic fields

Online Learning to the Next Degree.

Course360 is a flexible, customized online course program that engages and motivates all types of learners—and measurably improves student outcomes.

Ready to make the move to a comprehensive online course? Or would you like to keep part of your traditional course ‘on the ground’ while you give your students online access to specific course sections? Whatever your goal, **Course360** can take you to the next degree.
