LEARNING SOLUTIONS: Beyond Memorization. Understanding.
Offer your students learning resources focused on engagement, taking students through the levels of application, analysis, and critical thinking with depth and context.

MindTap
MindTap from Cengage Learning represents a new approach to a highly personalized, online learning platform. A fully online learning solution, MindTap combines all of a user’s learning tools—readings, multimedia, activities and assessments—into a singular Learning Path that guides the user through the curriculum. Educators personalize the experience by customizing the presentation of these learning tools to their students, even seamlessly introducing their own content into the Learning Path via “apps” that integrate into the MindTap platform. MindTap can also be deeply integrated into an institution’s Learning Management System (LMS) through a service called MindLinks.

Aplica
An interactive, online learning solution that has helped more than 4,900,000 students at over 1,700 institutions by increasing student effort and engagement, driving better learning outcomes, and minimizing instructor time spent on manual grading and class administration.
